Painted Echeveria

Echeveria nodulosa

Plant Height: 5 inches

Flower Height: 12 inches

Spread: 5 inches

Sunlight: ○ ◐

Hardiness Zone: 8b

Other Names: Hens And Chicks

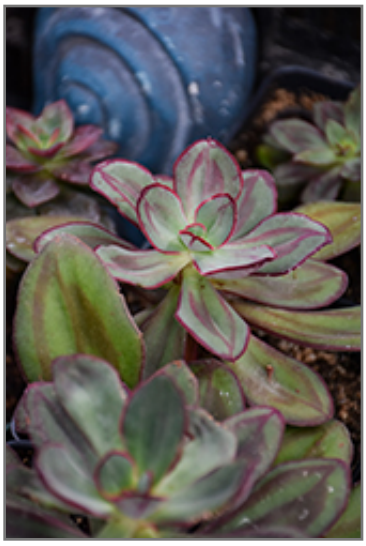

Description:

This variety is very drought tolerant, producing rosettes of spoon shaped foliage that is olive green, with vivid red margins; distinctive coral pink and yellow flowers on tall bracts in summer; ideal for containers in bright indoor areas

Features & Attributes

Painted Echeveria features unusual bracted coral-pink tubular flowers with yellow overtones and yellow tips rising above the foliage from early to mid summer. Its attractive succulent oval leaves remain olive green in color with distinctive red edges throughout the year.

This is a dense herbaceous evergreen houseplant with tall flower stalks held atop a low mound of foliage. Its relatively fine texture sets it apart from other indoor plants with less refined foliage. This plant should not require much pruning, except when necessary to keep it looking its best.

Planting & Growing

When grown indoors, Painted Echeveria can be expected to grow to be only 5 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 5 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It prefers dry to average moisture levels with very well-drained soil, and may die if left in standing water for any length of time. This plant should be watered when the surface of the soil gets dry, and will need watering approximately once each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil pH, but grows best in sandy soil. Contact the store for specific recommendations on pre-mixed potting soil for this plant.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
